ABSTRACT TITLE

Descriptive statement of project outcome

Target a Priority Outcome Clearly define the agency's priority outcome. Demonstrate the "why" this is important to an agency and the extent of the problem.

Translate Behavioral Insights What is the problem/bottleneck? What is the related literature base/insight? Finally, describe the intervention.

Embed Evaluation Describe evaluation methods (RCT or alternative design), how randomization happened, when the study ran and the full sample size. Include business as usual description - what they received.

Analyze Using Existing Data List outcomes and highlight the existing administrative data set used.

Results Clear summary sentence of results and results details. Were there any implementation challenges that impacted analysis, or exploratory analysis to be included? Cite analysis plan or registry information, where relevant. Can also include secondary outcomes and exploratory analysis, if relevant.

Build Evidence How is the agency using this result? Are there implications for policy or how a program is run? Are further evaluations needed? Is there anything worth looking into further learned from exploratory analysis?
